

Making Gardens to Hold Rain?!

Press release date: 2013-03-11

Rain Gardens create functional landscapes by soaking up and filtering rainwater that runs off roofs, driveways, lawns, or other "impervious surfaces." Homer Soil and Water Offers a Rain Garden cost-share program for private landowners and businesses which can help offset the cost by up to 50% for qualifying landowners.

For more information about the cost-share program and how these inexpensive and maintenance free rain gardens work, you can find Homer Soil and Water Conservation District's [brochure here](#) or contact them directly at 235-8177. They are located at 4014 Lake St., Suite 201A in Homer.
