The Alaska Energy Authority has advertized the availability of grants to fund design and construction of alternative energy projects. The potential to generate power through the installation of micro hydro generators on the water system transmission mains coming down the bluff (from the treatment plant to town) has been proposed. Public Works, with the assistance of Homer Electric Association, is prepared to submit an application for a grant to design such a facility.

**Recommendation:** The City Council approve an resolution in support of the grant application.
