**CITY OF HOMER  
HOMER, ALASKA**

Lord

**RESOLUTION 18-006**

A RESOLUTION OF THE HOMER CITY COUNCIL AMENDING  
RESOLUTION 13-095 AUTHORIZING THE CITY MANAGER TO KEEP  
THE HOMER EDUCATION AND RECREATION COMPLEX (HERC)  
GYMNASIUM OPEN FOR COMMUNITY RECREATION PROGRAMS  
THAT REQUIRE ONLY MINMAL HEAT AND UTILITIES UNTIL SUCH  
TIME AS THE BUILDING IS DEMOLISHED TO INCLUDE THE  
ADJACENT CLASSROOM AS USABLE SPACE FOR COMMUNITY  
RECREATION ACTIVITIES.

WHEREAS, Resolution 13-095 limited the use of the Homer Education and Recreation  
Complex (HERC) to only Community Recreation activities and only in the gym; and

WHEREAS, It is the City's understanding from correspondence from the State of Alaska  
Fire Marshall that opening the adjacent classroom (former shop room) to a maximum of 30  
occupants would require minimal upgrades that can be absorbed within the existing budget;  
and

WHEREAS, Opening up this classroom to Community Recreation activities will allow  
expanded opportunities in Homer for recreation such as Zumba and martial arts classes,  
among other activities; and

WHEREAS, Using the adjacent classroom space will not incur any additional operating  
cost beyond lighting allowing the building to remain in "warm status" with minimal heat.

NOW, THEREFORE, BE IT RESOLVED that the Resolution 13-095 is amended to include  
the adjacent classroom as usable space for Community Recreation activities.

BE IT FURTHER RESOLVED that the City Manager is authorized to contact the State of  
Alaska Fire Marshall and make necessary improvements to the space to comply with a  
maximum occupancy of 30 as long as improvements can be absorbed within existing budget.

CITY OF HOMER

  
BRYAN ZAK, MAYOR

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The age dependency ratio is derived by dividing the combined under-18 and 65-and-over populations by the 18-to-64 population and multiplying by 100.

The old-age dependency ratio is derived by dividing the population 65 and over by the 18-to-64 population and multiplying by 100.

The child dependency ratio is derived by dividing the population under 18 by the 18-to-64 population and multiplying by 100.

When information is missing or inconsistent, the Census Bureau logically assigns an acceptable value using the response to a related question or questions. If a logical assignment is not possible, data are filled using a statistical process called allocation, which uses a similar individual or household to provide a donor value. The "Allocated" section is the number of respondents who received an allocated value for a particular subject.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
