COVID-19 Community Level
Recommended actions based on current level

Stay up to date with COVID-19 vaccines. Get tested if you have symptoms. Wear a mask if you have symptoms, a positive test, or exposure to someone with COVID-19. Wear a mask on public transportation. You may choose to wear a mask at any time as an additional precaution to protect yourself and others. If you are at high risk for severe illness, consider wearing a mask when you are in public, including additional protective measures.

Weekly Metrics Used to Determine the COVID-19 Community Level

<table>
<thead>
<tr>
<th>Metric</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Case Rate per 100,000 population</td>
<td>356</td>
</tr>
<tr>
<td>New COVID-19 admissions per 100,000 population</td>
<td>8.8</td>
</tr>
<tr>
<td>% Staffed inpatient beds in use by patients with confirmed COVID-19</td>
<td>3.3%</td>
</tr>
</tbody>
</table>
Alaska Confirmed COVID-19 Cases
May 11 – June 21, 2022

11% Increase in Cases from Jun 08 - Jun 14

Statewide COVID-19 Cases by Week

Weekly Cases among Alaska Residents

- May 11 - May 17: 1,672
- May 18 - May 24: 1,701
- May 25 - May 31: 1,773
- Jun 01 - Jun 07: 2,158
- Jun 08 - Jun 14: 1,705
- Jun 15 - Jun 21: 2,123

Omicron Variant: US and Alaska Prevalence

Current

https://covid.cdc.gov/covid-data-tracker/#variant-proportions

https://experience.arcgis.com/experience/af2efc8bffb4c8dc83c2d1a134354074/
Pediatric COVID Vaccines

**Pfizer-BioNTech** (ages 6 months–4 years)
- **DOSE 1** (primary) → In 3-8 weeks → **DOSE 2** (primary) → In at least 8 weeks → **DOSE 3** (primary)

**Moderna** (ages 6 months–17 years)
- **DOSE 1** (primary) → In 4-8 weeks → **DOSE 2** (primary)

COVID Vaccine Schedule for Most People

Pfizer-BioNTech
- Ages 6 months–4 years
  - DOSE 1 (primary) → DOSE 2 (primary) → DOSE 3 (primary)
  - In 3-8 weeks → In at least 8 weeks → In at least 4 months
  - 2nd booster dose for some groups

Pfizer-BioNTech
- Ages 5 years and older
  - DOSE 1 (primary) → DOSE 2 (primary) → DOSE 3 (booster*) → DOSE 4 (2nd mRNA booster*)
  - In 3-8 weeks → In at least 5 months → In at least 4 months
  - People ages 60 years and older should get a 2nd booster.

Moderna
- Ages 6 months–17 years
  - DOSE 1 (primary) → DOSE 2 (primary)
  - In 4-8 weeks

Moderna
- Ages 18 years and older
  - DOSE 1 (primary) → DOSE 2 (primary) → DOSE 3 (booster*) → DOSE 4 (2nd mRNA booster*)
  - In 4-8 weeks → In at least 5 months → In at least 4 months
  - People ages 50 years and older should get a 2nd booster.

Janssen (J&J)
- Ages 18 years and older
  - DOSE 1 (primary) → DOSE 2 (booster*)
  - In at least 2 months → In at least 4 months
  - People ages 50 years and older should get a 2nd booster.
  - People ages 18 years and older who received 2 Janssen doses may get a 2nd booster.

COVID-19 Treatment – Need to Know

**Vaccines and booster shots** are the best preventative measure available against severe disease due to COVID-19.

**COVID-19 testing** gives visibility on infection. Testing as soon as symptoms start provides the best opportunity for optimal treatment.

**COVID-19 treatments** such as oral antivirals and monoclonal antibodies are available for individuals at risk for severe illness.

**Timing is important** some antiviral drugs need to be taken within 5 days of symptom onset.

If you’ve tested positive for COVID-19 or tested negative on a OTC test and you’re experiencing COVID-19 symptoms, **talk to your health care provider** as soon as possible. You can also contact your local Public Health Center or call the State’s COVID Helpline at 907-646-3322.
COVID Can Have Long-Term Impacts

Approximately 1 in 5 adults ages 18+ have a health condition that might be related to their previous COVID-19 illness, such as:

- Neurologic and mental health conditions*
- Cardiovascular conditions
- Kidney failure
- Respiratory conditions
- Musculoskeletal conditions
- Blood clots and vascular issues

Talk to your health care provider if you have symptoms after COVID-19
