FY26/27 Budget Narrative Worksheet

Information Technology Department

Objective Statement:	Functions and Responsibilities:				
Leverage information technology to streamline municipal operation and find innovative ways to connect the public to City services. Maintain secure, reliable digital communications infrastructure, and ensure the security, integrity and availability of City data.	<ul style="list-style-type: none">• Install, configure, and maintain computer hardware and software across all departments.• Operate and maintain communications infrastructure including servers, networking, phones, and cameras.• Ensure the security, availability, and integrity of City data.• Provide technical support to City staff and Council members.				
Future Considerations:	FY24/25 Accomplishments:				
<ul style="list-style-type: none">• Small government entities face sharp challenges to keep up with demands in the digital sphere. Municipal IT teams must balance limited resources against growing technology imperatives: a thriving flock of cybersecurity threats, aging technology infrastructure, and the challenges of managing service delivery. Meanwhile, emerging technologies are rapidly transforming how work gets done, and a tech-savvy citizenry expects to engage with services in new ways.• Project execution remains a challenge. The IT Team staff is minimally sufficient to perform operations and maintenance, so adding project tasking means delaying other work. The weekly backlog of service requests (a marker of how much work isn't getting done) averaged 50-75 requests since tracking began in FY24. Major infrastructure projects that the team performed in-house all saw significant delays compared to initial schedules, and qualified contractors are invariably costly.	<ul style="list-style-type: none">✓ Completed our first cybersecurity risk assessment.✓ Implemented cybersecurity training and vulnerability management programs.✓ Established IT service management program to regularize the fulfillment of requests.✓ Instituted an IT Asset Management Program to manage hardware lifecycles from procurement to retirement, maximize return on investment, and reduce financial and security risks.✓ Completed major upgrades to IT infrastructure such as the City phone system, City Hall internet link, and City-wide network microwave links.				
FY26/27 Goals and Objectives:					
<ul style="list-style-type: none">• Continue to develop robust cybersecurity governance, policies and practices based on results of cybersecurity risk assessment.• Complete cybersecurity infrastructure projects.• Continue the development of a professional IT Service Management Program, particularly<ul style="list-style-type: none">◦ Roll out performance monitoring and management program.◦ Improve technical documentation.• Continue focus on technical project planning and execution.• Use Asset Management Plan to oversee electronic hardware procurement lifecycles.• Address deferred maintenance to improve infrastructure reliability.• Prioritize technologies that foster improved digital maturity across the organization.

FY26/27 Budget Notes:

5634/5636 - Increases represent a proposal to address some deferred maintenance/hardware replacement out of operating budget and target replacement of a % of the fleet each year based on the IT Asset Management Plan (rather than capital requests to replace the entire fleet every 5-7 years that generate projects that are more difficult to implement).

Software increase includes plans to migrate to Office 365 (again moving what was traditionally capital investment to operating expense for software as a service (cloud)).
