WINTER METERED POWER PROGRAM AGREEMENT

For _____

Subject to availability, transient vessels and reserved stall vessels without available power at their stalls may sign up for the Winter Metered Power program from October 16 to April 15 and buy electrical power on a metered basis. Sign-up begins September 1. Metered vessels will be charged per KWH, plus a monthly availability fee of \$28.80. Rates per KWH may be adjusted without advance notice. A \$28.80 connect fee will be charged on your first bill. Subsequent requests for disconnects will stop service and reconnection will require a new agreement.

You will be charged on your first bill:

- 1) One-time Connect/Disconnect Fee of \$28.80
- 2) Monthly Availability Fee of \$28.80
- 3) Actual KWH Usage – rates subject to change without notice

Please contact administrative staff from 7 a.m. to 5 p.m., Monday through Friday to discontinue winter metered power. Failure to relocate your vessel from a metered stall will result in the continued availability fee being accessed.

Owner/operator is responsible for relocating vessel if assigned stall holder requests their stall. Harbormaster will attempt to contact owner/operator but may have to relocate the vessel before the owner/operator is available. Any moving of the vessel by the Harbormaster will result in a \$68.00 moving charge. Owner/operator may pay a \$68.00 moving charge at the start of service period. This will cover any and all relocations by the Harbormaster. This service is available subject to requesting the service and the availability of the Harbormaster.

I, _____, have read and understand the above conditions, and I apply for winter metered power and relocation services.
